

# Acceleration Packs for Radar<sup>®</sup> Compliance

Accelerate your Organizational Compliance with SEC, CSIN, and DORA

Acceleration Packs are the first step in defining organizational risk matrices. These regulation-specific guides are a shortcut to creating internal processes for risk, triaging, escalation, and reporting requirements.

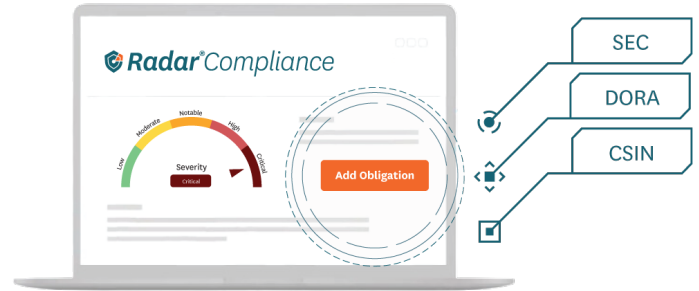

With your processes established, Acceleration Packs streamline the configuration of Radar<sup>®</sup> Compliance to help you proactively mitigate risk to your business and stakeholders.

## Regulation-specific Risk Mitigation

There is no shortage of regulators concerned with your organization's risk mitigation processes and decision-making. Keeping up with their unique criteria and requirements is critical—but taxing.

It's even harder when the task is designated to individuals instead of an automated solution.

Acceleration Packs, available in Radar<sup>®</sup> Compliance, **streamline efforts to operationalize regulator requirements to ensure both documentation and decision-making are consistent, transparent, and efficient**, ultimately protecting the trust of your stakeholders, both internal and external.

## Regulation-specific Acceleration Packs, Now Available in Radar<sup>®</sup> Compliance

- ✓ SEC | U.S. Securities and Exchange Commission
- ✓ CSIN | Includes FDIC, OCC, and FRS regulations
- ✓ DORA | The E.U.'s Digital Operational Resilience Act

Avoid costly penalties and fines—and an erosion of investor and public trust—by operationalizing your regulator compliance requirements using Acceleration Packs in Radar<sup>®</sup> Compliance.
